

The Fast Lane company group with more than 20 years of experience is proud to be able to provide complete Network and Storage training solutions for you. Our in-depth know-how of IT and communication solutions enables us to provide you not only with a full range of public schedule courses but also deliver for you project based and customized training solutions, already in Hungary too.

The Fast Lane Group ranks amongst the world's leading independent Cisco training providers, and is the only worldwide education partner for Network Appliance. An experienced Cisco Learning Solutions Partner of long standing, Fast Lane is represented worldwide with subsidiaries in all regions.

## High-end Network Training and Consulting

Fast Lane has earned a reputation as a first-call company for sophisticated networking projects, entailing both consultation and qualification programs. Alongside Fast Lane developed training courses, the Cisco curriculum encompasses Cisco Routing & Switching, Design and Service Provider courses. Special training in the areas of Cisco Unified Communications, Security, Wireless and Storage completes the Cisco course offering. In addition to authorized Cisco and NetApp training, Fast Lane also offers courses from other major organizations such as HP ProCurve, Brocade, Check Point, Citrix, CompTIA, Hewlett-Packard, Lotus, LPI, Microsoft, Novell, Oracle, Red Hat, RSA Security, SAP, Sun Microsystems, Trend Micro and ITIL.

Fast Lane's instructors and consultants have extensive expertise and real world experience working within complex technical environments. Using this knowledge Fast Lane has developed its own training programs, as well as offering the range of authorized Cisco and NetApp courses.

## Advanced Infrastructure Featuring more than 150 Training and Demo Labs

Fast Lane offers a training and demo lab environment, unrivalled worldwide, to cover every aspect of high-end networking. Featuring state-of-the-art devices and technologies, the labs and accompanying first-class service, raise the bar for training quality. In addition, these labs are accessible to consultants anywhere, enabling customers to experience and live-test the latest technologies.

In today's fast evolving world know-how and education are essential. To us it is indispensable to cooperate with Fast Lane, a reliable and highly qualified training partner. Fast Lane provides exclusive and customized training content to our distribution partners as well as to our customers.

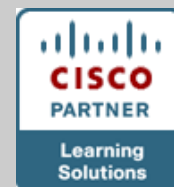

**György László, Acting General Manager Cisco Hungary**

# Fast Lane Course Offerings

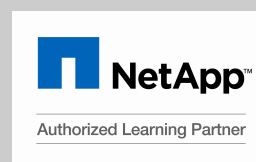

The business of today comprises of individuals, organizations, products, hardware and software all connected through a network driven by reliable technology solutions delivered in real time. At Fast Lane, we pride ourselves with being able to provide complete Network and Storage training solutions for you. Our in-depth know-how of IT and communication solutions enables us to address improvements in your company through the usage of technology and process optimization. We offer e-Learning and engage ourselves in Course Development in order to improve the level of our training.

Fast Lane, as a Cisco Learning Solutions Partner, is proud to offer Cisco training for many different specializations and areas. Whether it is Routing & Switching, Security, Unified Communications, Storage, Wireless or otherwise, we offer the complete range of Cisco training from beginner to advanced. Widely respected throughout the world, Cisco Certifications substantiate the knowledge and skills of certified specialists. They rank among the most sought-after qualifications for internetworking professionals.

Fast Lane has been selected as the first worldwide Network Appliance Learning Partner. Under NetApp's Authorised Learning Partner program, Fast Lane is able to deliver NetApp authorised courses – both standard and customised worldwide. Fast Lane has made a large investment in NetApp lab equipment and only uses certified and highly experienced instructors. All courses are packed with practical lessons, featuring extensive hands-on experience that thoroughly engage each student in installation, configuration and troubleshooting activities.

Fast Lane is able to provide a whole range of HP Pro Curve recommended trainings. ProCurve offers complete network solutions that provide a unique network design strategy: command from the centre of the network and control to the edge of the network. The ProCurve Networking training and certification program offers a tremendous opportunity to be at the forefront of this new networking strategy - the Adaptive EDGE Architecture.

## Certifications - Your route to success

Fast Lane offers courses to network specialists being the ideal preparation for the Cisco, NetApp and ProCurve Certifications. For any further information concerning our courses or Cisco Career Certification please contact our experts at +36 (1) 327 4528 or send an e-mail with your queries to [info@flane.hu](mailto:info@flane.hu). On our website [www.flane.at](http://www.flane.at) you can find more detailed information on courses and the company.

## Onsite Training and Individual Workshops

Our coaches are happy to tailor courses and curricula to suit your company's circumstances, goals and requirements as well as participants' prior knowledge and skills. If desired, classes can focus on special subjects that are critical to your company or incorporate examples that are specifically related to your enterprise.
